

My soul is the part of me I least understand. Somewhat an illusive commodity... but I know this of my soul... "It believes". It believes in me, in you, in us, in the bond that we have embraced, and will continue throughout this life and whatever lies beyond.

My soul longs for something greater, is patient, is kind, not envy, not boastful, not proud, not rude, not self-seeking, not easily angered, keeps no record of wrongs, does not delight in evil, rejoices with the truth, always protects, always trusts, always hopes, always perseveres, never fails, and endures forever everlasting.

I'll forever love you... and this I vow to the end of time. All my love, for all your life.

Chemistry of Love

A relationship that involves an intense chemistry between two people is extremely powerful! Sometimes chemistry is the reason that the relationship starts, while other times chemistry is discovered after the relationship is initiated. When there is a relationship that lacks chemistry, it tends to lead to a different kind of love or a more platonic friendship.

Chemistry between two people can be described as a type of biological electricity that gives the couple a rush of passion when they are together. Sometimes the chemistry is so powerful between a couple, that it can be mutually felt when they are just in each other's presence and are not even touching. It is this non-tangible type of chemistry that is the most powerful of all, as it just intensifies the closer the two people get to each other. When such a couple's hands touch, there is an instant biological response, which almost makes them feel like they are weightless and floating.

True, powerful chemistry is emotionally intoxicating for the couple involved. Couples that are this intensely attracted find it hard to pull away from each other in order to address other aspects of their day to day life. It is almost as though the couple is experiencing a huge amount of passion toward each other, which takes them to a personal world of their own, filled with the deepest of attraction toward each other.

Although chemistry is a very strong feeling between couples, it can exist without real love. Chemistry without love is something that can be emotionally

It is governed by a complex set of unwritten rules that are loosely defined as etiquette. Such rules dictate where, when, with whom and in what manner we all attract the opposite sex. We generally obey these unofficial rules by instinct but we also only become aware of the rules when someone commits a breach of them.

Dating or courtship is the process of choosing and attracting a mate for companionship, sex, marriage and/or sexual reproduction. It is also the pre-arranged meeting (exclusive) of two people with mutual interest in one another to communicate with and to comprehend through shared participation in social activities.
